United States/Americas	+1 801 222 5204
Europe, Africa & Middle East	+44 (0) 20 8867 6305
Asia (except China/Korea)	+86 21 5869 8668

Important Notification

EDIUS 8 requires SHA-2 hash algorithm code signing for Grass Valley hardware driver installation. All versions of Windows 7 and Windows 8 / 8.1 and 10 already support SHA-2 code signing, but if you are running Windows 7, you will need to install Security Updates.

SHA-2 code signing requires the installation of TWO Security Updates on Windows 7 in order to install Grass Valley hardware.

They MUST be installed in the following order:

1. Security Update for Windows 7 for x64-based Systems (KB3035131)
2. Security Update for Windows 7 for x64-based Systems (KB3033929)

If they have not been installed, EDIUS installer will ask you to install the security updates.
If you fail to install EDIUS even if the updates already installed or you cannot install the updates, please refer to EDIUSWorld.com FAQ to solve the issue.

New Features of Version 8.31.1333

This update provides the following additional features:

EDIUS

- Support Sony XAVC version 1.2 clip.
- Support Canon XF-AVC version 2.2 clip.
- Support Sony X-OCN clip.

Update History

The following issues are fixed or improved in this version:

EDIUS

- Improved ECW (Effect Control Window) UI design of Primary Color Correction.
- EDIUS fails to open PSD clip that is created by Adobe Photoshop CS6
- Line noise appears in Canon XC10 MXF clip played in EDIUS.
- EDIUS 8 generates incorrect AVC-Ultra LongG clips.
- Disc Burner proceeds force frame rate conversion to 23.98p if 24p timeline is burned to Blu-ray disc.
- Project template cannot save if drive root is selected for project location.
- Burned disc menu corrupts if project format conversion is proceeded in Disc Burner (SFDC00557309)
- EDIUS crashes if project auto save runs after exiting Disc Burner.

GV Browser

- GV Browser fails to playback certain MOV clip shot by Panasonic DMC-GF2 camera.

Design Limitations

Restrictions after Uninstallation of QuickTime for Windows

The following functionality will be lost if QuickTime is uninstalled:

Still Image File Formats: Flash Pix; Mac Pict; QuickTime Image

MOV Video File Formats: 3GP; 3G2; M4V or some MOV file formats

Audio File Formats: MOV (other than Linear PCM and AAC); QuickTime Audio

Exporting AAF Files

In the [Project Exporter (AAF)] dialog box, selecting [Type: 1] in [Preset] exports files in AVI (Grass Valley HQ) instead of QuickTime (H.264).
